EXPERIENCES

Software Engineer, Redblock (Formerly Quolum)
Dec 2023 – Present

- Built **canvas interface** to orchestrate automated workflows, introducing customizable nodes using *React Flow*.
- Engineered a **custom DSL editor** with real-time syntax and variable autocompletion using *CodeMirror*.
- Enhanced UI/UX and data rendering by building **a robust library of reusable components**—including resizable dynamic tables, responsive navigation drawers, chip-based inputs, and structured skeleton loaders.

Software Engineer, Quolum
May 2022 – Nov 2023

- **Upgraded** the core frontend stack (React 16 to 18, Apollo Client, React Router) and spearheaded the **transition to TypeScript**, implementing lazy loading and centralized error handling (Sentry).
- Developed **high-performance SaaS analytics dashboards** with dynamic models and interactive visualizations using *Recharts*.

Junior React Frontend Developer, TKNZ
Oct 2021 – May 2022

- Built and scaled a high-performance NFT platform serving 13K+ users by migrating from React.js to Next.js; delivered core product features including marketplace flows, user portals while implementing secure authentication (2FA, KYC) and a scalable frontend architecture.
